

Universal Home Care (UHC) recognizes the need and importance of providing patients with chronic cardiac, pulmonary and vascular disorders our uniquely designed **Cardiovascular Care Management Program**, which strives to improve and strengthen cardiovascular health that has declined over time and provides a support system to reduce or eliminate ER visits and repeat hospitalizations.

With cardiovascular/pulmonary care at home, you or your loved one can rest assure that our team will provide topline care solutions for better self-care and improved quality of life. The program is specially designed and individually adapted to help patients who suffer from cardiovascular complications resume active and productive lives.

Patients who would benefit:

- **Heart Disease**
- **Chronic Obstructive Pulmonary Disease (COPD)**
- **Vascular Conditions**

The goals of treatment provided via our program are intended to regularly compile and assess caregiver reports of which our Cardio Team is able to identify risks and develop a follow-up plan specifically for patient and family members.

UHC works closely with a patient's primary care physician to coordinate care & avoid duplication of services. To learn more about this program, please contact us at: 800-200-1020.
